EDUCATION

BTech – CSE (IoT & Cybersecurity with Blockchain Technology) *Aug 2024-Present* SVKM
Dwarkadas J Sanghvi College of Engineering CGPA: 8.76
Diploma – Computer Engineering *Oct 2021 – Apr 2024*
SVKM Shri Bhagubhai Mafatlal Polytechnic
88.87%

EXPERIENCE

Web Developer Intern — Sahu Technologies *Jun2023 - Aug 2023 (Remote)*

- Developed and managed 200+ webpages using WordPress; customised themes and plugins for improved UI/UX.
- Built the frontend of an e-commerce website ensuring fully responsive design across all devices.
- Followed secure coding practices including input validation and HTTPS compliance on all deployed pages.

SDE Intern — ZootechX *July2026 - Present*

- Develop websites, software, and web applications based on client requirements.
- Design and implement responsive, user-friendly interfaces and interactive features.
- Translate client requirements into functional and visually polished digital solutions.
- Collaborate on UI/UX design, frontend development, testing, and deployment.

PROJECTS

SpotHole: Pothole Reporting Platform *March 2024*
Tech: MySQL · NodeJS · Geolocation API

- Built the frontend interface and integrated an interactive geolocation map for real-time pothole reporting.
- Designed a clean, user-friendly UI enabling seamless report submission and precise location pinning.
- Performed functional and exploratory testing to validate geolocation accuracy and form submission flows.
- Contributed to ~40% reduction in average reporting time as part of a collaborative team project.

ReviewShield – AI-Based Fake Review Detection System *May 2026*
Tech: Python · NLP

- Built an AI-powered system to detect fake product reviews using NLP, sentiment analysis, and similarity algorithms to generate a trust score.

AI Optimization Pipeline *July 2026*
Tech: Python · Flask · Pytest

- Optimized an AI pipeline by reducing redundant processing, improving execution efficiency resulting in lower computational overhead.
- Debugged intermittent pipeline failures by identifying root causes and implementing reliable fixes for stable execution.
- Developed automated tests using Pytest and integrated a CI workflow to validate code changes consistently.
- Improved code modularity and maintainability through refactoring and structured project organization.

SKILLS

Programming Languages	: Python, SQL, JavaScript, C
Frontend	: HTML5, CSS3, React.js, Wordpress
Backend	: Node.js, Express.js
Libraries	: NumPy, Pandas, OpenCV
Databases	: MySQL, MongoDB
Tools/Platforms	: Git, GitHub, Vercel, WordPress

EXTRACURRICULAR

Editorial Head – DJSISACA *Aug 2025 – August 2026*

- Led end-to-end content production for CyberSeconds; managed a team of writers ensuring quality and timely publication.
- Reviewed and edited all written submissions, maintaining consistent editorial standards across issues.
